Disable the `smartd` service on NetApp HCI compute nodes

By default, the `smartd` service periodically polls the drives in your compute nodes. You should disable this service on all compute nodes after you deploy NetApp HCI.

Steps

1. Using SSH or a local console session, log in to VMware ESXi on the compute node using root credentials.
2. Stop the running `smartd` service:

```
/etc/init.d/smartd stop
```

3. Prevent the `smartd` service from starting at boot:

```
chkconfig smartd off
```

4. Repeat these steps on the rest of the compute nodes in your installation.
